SUMMARY

Frontend SDE with 2+ years hands-on expertise in building scalable, high-performance web applications using **Next.js, React.js, and TypeScript**. Proven track record at CSS Founder in engineering resilient user interfaces, optimizing frontend performance, and reducing user bounce rate by **20%**. Adept at cross-functional collaboration, implementing robust state management, writing clean TypeScript interfaces, and engineering seamless RESTful API integrations.

SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL (MySQL)
Frameworks & UI: React.js, Next.js, Redux Toolkit, Tailwind CSS, GSAP, DOM Manipulation
Core Technical: State Management, API Integration, Performance Optimization, Responsive Web Design
Tools: Git, GitHub

EXPERIENCE

Frontend SDE — CSS Founder

Noida, U.P | June 2024 – Present

- Engineered a high-performance browser-based visual editor using customized DOM manipulation hooks and state synchronization, cutting live visual re-render latency by **45%**.
- Architected scalable ETA Visa application infrastructure using **Next.js**, strictly typed **TypeScript** interfaces, and responsive layouts tailored for optimal web vitals.
- Managed dynamic queue of client-facing web products, delivering maintainable UI components, fluid animations (GSAP), and robust API integrations strictly on schedule.
- Increased session duration by **25%** and reduced client UI revisions by **50%** by engineering responsive, pixel-perfect design systems across 5+ device breakpoints.

UI Developer — GET WEB INDIA

Noida, U.P | Jan 2023 – Apr 2024

- Analyzed complex business requirements to design and execute end-to-end technical roadmaps for front-end application architectures.
- Created modular, **reusable UI components** and design patterns implemented across multiple client projects to accelerate development cycles.
- Diagnosed and **resolved critical UI rendering and browser compatibility issues** utilizing Chrome DevTools, ensuring high fidelity across platforms.

Projects

ETA Visa Application ([link](#))

- Engineered an interactive real-time visual canvas editor utilizing custom DOM manipulation hooks and localized state management, reducing live re-render latency by **45%** during template edits.

Webuildex Visual Web Engine ([link](#))

- Architected a real-time drag-and-drop web editing engine with optimized state synchronization and custom DOM hooks for instant visual feedback.

Stylam Web Platform & Design System ([link](#))

- Designed and developed responsive UI design systems for Asia's largest laminate manufacturer, streamlining core customer navigation and brand UX.

EDUCATION

Intermediate (Class XII) — Islamia Inter College

Shahjahanpur, U.P | April 2021
