Frontend Software Engineer with 3+ years of experience developing responsive web applications interface using React, Next.js, and TypeScript. Experienced in building **reusable UI component libraries**, reducing page load latency, and writing clean, maintainable code. Adept at handling state management, API integrations, and collaborating with backend engineers to deliver end-to-end features.

SKILLS

Programming Languages: JavaScript , TypeScript

Libraries and Tools: React, Redux, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, MaterialUI, Ant Design, Git, Webpack, Nodejs, Expressjs, Chart.js

Debugging and Testing: Browser DevTools, Jest, Lighthouse

Project Management & Version Control: Jira ,Github

EXPERIENCE

Frontend Software Engineer — CSS Founder

Noida, U.P | June 2024 – Present

- Designed and implemented the complete frontend infrastructure for the **Website Builder platform**, improving application responsiveness and **scalability by 50%**.
- Created shared frontend patterns and **20+ modular components**, cutting feature delivery time by **25%** and ensuring consistent UI across projects.
- Reduced page interaction latency **45% by fixing re-render** bottlenecks and optimizing asset loading.
- Took part in sprint planning, peer code reviews, and weekly **production releases**.

Frontend UI Developer — GET WEB INDIA

Noida, U.P | Jan 2023 – Apr 2024

- Converted **Figma designs** into responsive, pixel-perfect interfaces while ensuring cross-browser compatibility and consistent user experience.
- Built modular **UI components** used across multiple client websites to speed up development time. Fixed layout bugs and **cross-browser styling issues** across Chrome, Firefox, and Safari.

Projects

ETA Visa Application - Next.js, Tailwind, Typescript

([link](#))

- Built a 5-step **visa application UI** using React and Redux Toolkit, managing multi-page form state, dynamic client-side field validation, dynamic step routing, and file upload dropzones across 12 UI screens—**reducing user drop-off by 35%**.

Webuildex Visual Web Engine - Next.js, Typescript, Tailwind, Framer motion

([link](#))

- Built a **real-time** drag-and-drop web builder that lets **users edit layout templates visually**. Implemented live state synchronization and DOM manipulation hooks for instant page previews without page reloads.

Stylam Web Platform & Design System - Html, CSS, Javascript

([link](#))

- Developed a responsive web platform and reusable UI component library for a **large manufacturing enterprise**. Standardized button styles, typography and layout grids to ensure clean navigation across all screen sizes.

ACHIEVEMENTS

Earned the "**Star of the Month**" award at CSS Founder for contributions to the Website Builder. **Single-handedly** led the frontend development, delivering a smoother and more insightful user experience.
