PROFESSIONAL SUMMARY

Frontend Software Engineer with **3+ years** of professional experience building production React/Next.js applications, including a visual website builder with a data-driven rendering architecture. Self-taught developer with hands-on, project-driven experience across the modern React ecosystem. Strong track record of shipping performant, accessible UIs (**92+ Lighthouse scores**) and managing multiple concurrent client projects.

SKILLS

Programming Languages: JavaScript, TypeScript

Libraries & Frameworks: React.js, Next.js, Redux, Node.js, Express.js, Chart.js, GSAP, HTML5, CSS3, Tailwind CSS, Material UI, Ant Design

Tools & Design: Figma, Git, GitHub

Debugging & Testing: Browser DevTools, ESLint, Prettier, Jest, Lighthouse

WORK EXPERIENCE

Frontend Software Engineer — CSS Founder, Noida, UP

June 2024 – Present

- Built Webuildex, a visual website builder using Next.js, React, TypeScript and Tailwind CSS, enabling users to choose templates and customize website content, sections, layouts, colors, and fonts with live preview.
- Developed **20+ reusable React sections** and a data-driven rendering system, allowing multiple website templates to share the same components and editor instead of building each page separately.
- Delivered **6+ core editing workflows** including live content editing, adding/deleting/reordering sections, page switching, template customization, and desktop/mobile preview.
- Achieved **92 Lighthouse Performance, 96 Accessibility, 100 Best Practices, and 100 SEO** scores, with **0.18s local LCP and 0.00 CLS** measured using Chrome DevTools.
- Handled project requirements directly with team members and clients, turning functional specifications into clean, working frontend code that matched expected features.
- Took part in sprint planning, peer code reviews, and weekly production releases.
- Balanced **2-3 concurrent client projects** at a time — switching context between codebases, debugging production issues, and tracking tasks and deadlines across each.
- Coordinated daily with designers and backend engineers to align on API contracts, UI states, and edge cases before implementation.

Frontend UI Developer — Get Web India, Noida, UP

January 2023 – April 2024

- Developed and maintained responsive, cross-browser web applications using React.js, JavaScript, HTML5, and CSS3, ensuring high performance and design fidelity.
- Collaborated with designers and backend developers to implement new features and enhance existing ones, following best practices in code quality and review.
- Worked across the frontend stack including UI component development, state management, and integration with backend APIs.

PROJECTS

[Webuildex](#) — Next.js · TypeScript · Tailwind CSS

- Drag-and-drop website builder with **10+ templates and 30+ editable components**, featuring synchronized live previews with no page reloads.

[User Board](#) — JavaScript (ES6) · CSS

- Built a high-performance, responsive enterprise-grade UI clone supporting complex interactive workflows, with optimized DOM structure and lazy-loaded components.

[Stylam](#)

- Built new features and resolved UI bugs reported by real users on Asia's largest laminate sheet manufacturer's website, improving overall product experience and reliability.

ACHIEVEMENTS

- Awarded **Best Performer of the Month** at CSS Founder for concurrently managing and executing multiple high-impact web development projects while consistently meeting aggressive delivery timelines without compromising code quality or performance.
