

MUNEEB HASAN KHAN

Noida, Uttar Pradesh, India | [+91-9569034040](tel:+91-9569034040) | muneebkhan9569@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Front-end developer with **3+ years** designing and building high-quality, cross-browser web interfaces, from responsive layouts to production React/Next.js applications. Experienced translating visual designs into pixel-accurate, accessible HTML5/CSS3/JavaScript front ends, including a component-driven visual website builder with live desktop and mobile preview. Comfortable working alongside backend teams to wire front-end markup into larger applications, and consistently deliver on aggressive timelines without compromising design fidelity or performance (**92+ Lighthouse scores**).

CORE SKILLS

Front-End Markup & Styling: HTML5, XHTML, CSS3, responsive & mobile-first UI design

Languages: JavaScript (ES6+), TypeScript

Frameworks & Libraries: React.js, Next.js, Redux, Bootstrap, Material UI, Ant Design, GSAP

Design Tools: Figma (UI design & redesign)

Cross-Browser & Validation: Cross-browser/responsive QA, regular-expression-based form & input validation

Version Control & Tooling: Git, GitHub, ESLint, Prettier, Chrome DevTools, Jest, Lighthouse

WORK EXPERIENCE

Frontend Software Engineer — CSS Founder, Noida, UP

June 2024 – Present

- Designed and built **Webuildex**, a visual website builder (Next.js, React, TypeScript, Tailwind CSS) letting users pick templates and customize sections, layouts, colors, and fonts with a live, no-reload preview.
- Designed **20+ reusable front-end sections** and a data-driven rendering system so multiple website templates share the same components and editor instead of one-off pages — improving design consistency and delivery speed.
- Delivered **6+ core editing workflows**: live content editing, add/delete/reorder sections, page switching, template customization, and synchronized desktop/mobile preview.
- Achieved **92 Lighthouse Performance, 96 Accessibility, 100 Best Practices, and 100 SEO**, with **0.18s local LCP and 0.00 CLS**, verified in Chrome DevTools.
- Worked directly with clients and team members to turn functional/design specs into clean, working front-end code matching expected visual and interaction requirements.
- Coordinated daily with designers and backend engineers to align UI markup with API contracts, UI states, and edge cases before implementation.
- Took part in sprint planning, peer code reviews, and weekly production releases while balancing **2–3 concurrent client projects**.

Frontend UI Developer — Get Web India, Noida, UP

January 2023 – April 2024

- Designed and maintained responsive, cross-browser web interfaces using React.js, JavaScript, HTML5, and CSS3, prioritizing high performance and design fidelity to source mockups.
- Collaborated with designers and backend developers to implement new UI features and enhance existing ones, following code-quality and review best practices.
- Worked across the front-end stack — component development, state management, and wiring UI to backend APIs.

PROJECTS

Webuildex — webuildex.vercel.app | Next.js · TypeScript · Tailwind CSS

- Drag-and-drop website builder with **10+ templates and 30+ editable components**, featuring synchronized live previews with no page reloads.

User Board — muneeb-hk1.github.io/vspagy | JavaScript (ES6) · CSS

- Built a high-performance, responsive enterprise-grade UI clone supporting complex interactive workflows, with optimized DOM structure and lazy-loaded components.

Stylam — stylam.com | Client project

- Built new front-end features and resolved UI bugs on Asia's largest laminate sheet manufacturer's website, improving product experience and reliability.

ACHIEVEMENTS

- Awarded **Best Performer of the Month** at CSS Founder for concurrently managing multiple high-impact web development projects while consistently meeting aggressive delivery timelines without compromising design quality or performance.
